Self-Priming Pool Pump BR400E Series

The BR400E series range of swimming pool pumps are compact and purpose designed to suit most domestic applications. The pumps are self-priming. The motors are built to CE/VDE European standards. They are IP55 classified/approved. The pump

body is manufactured from high grade UV stabilised thermo-plastic for extended corrosion resistance and strength.

FEATURES: include 4" see through trap with 3/4" drain plug and 50mm adjustable inlet and outlet unions. The pumps are delivered with cord and plug from 0,25kW to 0,75kW single phase.

See-trough trap lid

4" trap with easy-open, see through lid. Includes 50mm slip union connector for suction and discharge port.

Motor

The single phase motor is built according to European CE standards with IP55 protection.
